SUMMARY

- **Senior Software Engineer, 7+ years**, building and scaling backend services, APIs, and distributed systems for enterprise SaaS platforms.
- **Node.js and TypeScript backend engineer** (NestJS, Express.js, Fastify, GraphQL, gRPC, PostgreSQL, MongoDB, Redis, AWS) — built backend infrastructure supporting **2–3B daily requests** and cut p95 latency from ~6s to **under 200ms**.
- Designed multi-tenant services, shared internal libraries adopted by **9 product teams**, and a **multi-product authorization framework** used platform-wide; strong on performance, reliability, observability, and cost reduction.
- Drove security-critical initiatives to **zero audit findings** and **3x faster** incident resolution; built a **RAG-based Slack support bot**, live with the internal support team.

CORE SKILLS

- **Primary Stack:** MongoDB, Express.js, React.js, Node.js, JavaScript, TypeScript
- **Backend & APIs:** NestJS, Express.js, Fastify, REST APIs, GraphQL, gRPC, Protobuf, Socket.io, Microservices, Distributed Systems, Kafka, RabbitMQ, Multi-Tenant Architecture, Performance Optimization
- **Auth & Security:** OAuth 2.0, JWT, RBAC, SSO, MFA/TOTP, OPA/Rego policy engines
- **Frontend Engineering:** React.js, TypeScript, JavaScript, Redux, Redux Thunk/Saga, AngularJS, SCSS, Styled Components, Micro-Frontends
- **Databases & Caching:** MongoDB, PostgreSQL, SQL, Redis, ioredis, Mongoose, Sequelize, Firebase (Auth, Firestore, Storage, Hosting)
- **Cloud & Infrastructure:** AWS EC2, S3, Lambda, API Gateway, CloudFront, Route 53, IAM, Nginx, Docker
- **Testing & Quality:** Jest, Unit/Integration/E2E Testing, TDD, Test Automation
- **Build, DevOps & Observability:** Jenkins, GoCD, Datadog, Observe, AWS CloudWatch, CloudTrail, X-Ray, CI/CD, Jira
- **AI Engineering:** RAG (Retrieval-Augmented Generation), LLM-Backed Bots, Claude Code, GPT, GitHub Copilot, AI-driven RCA, AGENT.md/SKILLS.md agent-navigation docs

EXPERIENCE

Contentstack India Pvt. Ltd. · Remote, Pune

Senior Software Engineer · Aug 2024 – Aug 2026
Software Engineer II · Nov 2022 – Jul 2024 — promoted to Senior Software Engineer

Backend Platform & Scale:

- Optimized backend services handling **2–3B requests daily** by contributing to a high-throughput runtime migration and redesigning policy evaluation and Redis caching, cutting p95 latency from ~6s to under 200ms.
- Redesigned service logging around high-signal events, cutting log volume to reduce **Datadog/Observe costs**, and built **p95/p99 latency dashboards** that sharpened RCA.
- Owned end-to-end production incident response, increasing resolution throughput **3x** and cutting average resolution time ~30%, maintaining SLA commitments for enterprise accounts.

Distributed Services & Shared Libraries:

- Shipped an internal gRPC-backed package adopted by **9 product teams**, letting them consume authentication and authorization without reimplementing either.
- Architected the multi-tenant RBAC system, transforming two fixed roles into an **unlimited, multi-product** framework enforced through OPA/Rego policies, now a recurring differentiator in enterprise sales.
- Built a unified authentication layer spanning multi-tenant OAuth 2.0, SAML-based enterprise SSO, and SCIM provisioning, partnering with **Okta and Microsoft Entra ID** engineering to ship native marketplace apps.

Security & Reliability:

- Launched a self-serve session management suite (idle/absolute timeouts, whitelisting, active termination), achieving **zero findings** in a third-party security audit.
- Drove remediation of a separate third-party audit, cutting open findings from ~150 to 10 within two quarters, and moved 2FA from SMS to authenticator apps platform-wide.

Cross-Team & Technical Leadership:

- Guided a new team member and junior engineers on the team's core stack through pairing and design walkthroughs.
- Advised other product teams on **policy design and RBAC adoption**, unblocking rollout beyond own team's scope.

AI Engineering:

- Built a **RAG-based Slack support bot** on internal docs and ticket history, answering questions across the team's service domain for Contentstack's support team in production.

- Applied Claude Code, GPT, and Copilot across the SDLC (review, tests, debugging, RCA), driving **2–3x more PRs per sprint** and **85%+ test coverage**.
- Authored AGENT.md/SKILLS.md agent-navigation docs and a prompt/playbook library, cutting bug turnaround from 2–3 days to one.

Awards received: Thank You Award — Q1 2026 (session management rollout, zero audit findings), Q4 2024 (sustained ownership of the RBAC platform), Q3 2023 (customer-facing failure resolution and policy hardening).

Bestpeers Infosystem Pvt. Ltd. · Hybrid, Indore

Senior Software Engineer · Sep 2021 – Nov 2022
Software Engineer · Sep 2020 – Sep 2021 — promoted to Senior Software Engineer

- Led **5+ developers** across concurrent client engagements, running Agile ceremonies (Scrum/Kanban) and sustaining **80%+ on-time delivery**.
- Decomposed a monolithic application into **3 independently deployable microservices**, enabling parallel development across healthcare, edtech, and staffing platforms.
- Delivered client engagements for **Pinzon Health** (remote patient monitoring), **Clipboard Health** (nurse staffing marketplace), and **Xtensio** (cut editor render time **30%**), driving test coverage beyond **85%**.

Gyrix TechnoLabs LLP · On-site, Indore

Software Engineer · Feb 2019 – Sep 2020 (incl. 2-month internship)

- Accelerated deployment cycles via CI/CD pipelines, cutting deployment time from 2–3 hours to **under 30 minutes**.
- Migrated AngularJS to React.js micro-frontends, cutting load time from ~6s to **2.5s**.
- Delivered client engagements for **FutureSkill** (Sweden-based EdTech) and **SoftwareSkills.se** (Sweden-based job platform) across a **19-month** engagement, maintaining **80%+ test coverage**.

EDUCATION

- **Amity University Madhya Pradesh**: Bachelor of Technology, Computer Science · Minor: Corporate Finance · 2015 – 2019

CERTIFICATIONS

- **Data Structures & Algorithms** – Scaler · Mar 2025
- **Web Security: OAuth and OpenID Connect** – LinkedIn Learning · 2024
