

Targeting a **Senior Software Engineer, Engineering Lead, or Staff Engineer** role to lead architecture, technology strategy, engineering excellence, and product modernization while delivering scalable solutions, mentoring teams, and driving measurable business and customer outcomes.

PROFILE SUMMARY

- Senior Software Engineer** with **over 7 years of experience** architecting and delivering enterprise SaaS platforms, distributed systems, and high-scale backend infrastructure across product environments.
- Backend & Distributed Systems expert** with strong hands-on proficiency in Node.js, NestJS, Golang, GraphQL, gRPC, microservices, MongoDB, PostgreSQL, Redis, and AWS; engineered platform infrastructure supporting **2-3B daily requests** with high availability and performance.
- Platform Architecture specialist** with expertise in RBAC, OAuth 2.0, SAML 2.0, OIDC, SCIM, JWT, SSO, OPA, and Rego; modernized a core platform capability into a scalable, multi-product framework with granular, policy-based controls consumed by 9+ product teams.
- Production Engineering leader** experienced in driving platform-wide initiatives, architecture modernization, observability, reliability, compliance, and SLA excellence; delivered solutions that cleared third-party audits with **zero findings**, accelerated incident resolution by **3x**, and reduced resolution time by **~30%**.
- AI-augmented engineering professional** leveraging Claude Code, GPT, and GitHub Copilot across the SDLC to improve development velocity, code quality, testing, debugging, RCA, and security analysis; contributed to **2-3x higher PR throughput and 85%+ test coverage**, complemented by expertise in React.js, TypeScript, CI/CD, Docker, Jenkins, and modern engineering practices.

CORE COMPETENCIES

- Platform Engineering & Distributed Systems | Backend & Microservices Architecture | API & gRPC Platform Design | Identity & Access Management (IAM) | Authentication, Authorization & SSO | RBAC & Policy-Based Access Control | Application Security & Compliance | Performance Engineering & Observability | DevOps, CI/CD & Agile Delivery | AI-Augmented Software Engineering | Software Quality, Testing & Reliability

TECHNICAL SKILLS

- Platform & Backend Engineering:** Node.js | NestJS | Express.js | Fastify | Golang | REST APIs | GraphQL | gRPC | Protobuf | Socket.IO | Microservices | Kafka | RabbitMQ
- Identity & Access Platform:** RBAC | OAuth 2.0 | SAML 2.0 | OIDC | SSO | SCIM | JWT | MFA/TOTP | Zero Trust Architecture | Passport.js | OPA | Rego | Okta | Microsoft Entra ID | Ping Identity
- Frontend Engineering:** React.js | TypeScript | JavaScript | Redux | Redux Thunk/Saga | AngularJS | SCSS | Styled Components | Micro-Frontends
- Databases & Caching:** MongoDB | PostgreSQL | SQL | Redis | ioredis | Mongoose | Sequelize | Firebase (Authentication, Firestore, Storage, Hosting)
- Cloud & Infrastructure:** AWS EC2 | S3 | Lambda | API Gateway | CloudFront | CloudWatch | Route 53 | IAM | Nginx | Docker
- Testing & Quality:** Jest | Unit Testing | Integration Testing | E2E Testing | TDD | Test Automation | 85%+ Test Coverage
- DevOps & Observability:** Jenkins | GoCD | PM2 | Datadog | Observe | CI/CD | Postman | Jira
- AI-Augmented Engineering:** Claude Code | GPT | GitHub Copilot | AI-Assisted Code Review | AI Test Generation | AI-Assisted Debugging | AI-Driven RCA | AI Security Analysis | AGENT.md / SKILLS.md Agent-Navigation Documentation | Prompt & Playbook Libraries | Prompt Caching & Model Routing

MAJOR CLIENTS

- Pinzon Health | Remote Patient Monitoring:** Built the onboarding-to-monitoring flow, ingesting live vitals from connected BP devices for remote review and in-app medication assignment; implemented automated alerts that reduced clinician review effort.
- Clipboard Health | Nurse Staffing Marketplace:** Implemented nurse-side shift search, including geolocation-based filtering and apply-for-shift workflows, connecting nurses with nearby hospital shifts.
- FutureSkill | Sweden-Based EdTech Platform:** Delivered course delivery workflow, user management capabilities, and responsive front-end experiences.
- SoftwareSkills.se | Sweden-Based Job Application Platform:** Contributed across backend services and front-end platform development, supporting core application workflows and user experiences.
- Xtensio | Canva-Like Design Platform:** Reduced editor render time by 30% by rebuilding component rendering with lightweight components; delivered layering functionality and new reusable design components.

EDUCATION

- Amity University Madhya Pradesh** — Bachelor of Technology, Computer Science | Minor: Corporate Finance | 2015 – 2019

CERTIFICATIONS

- Data Structures & Algorithms** - Scaler | Mar 2025
- Web Security: OAuth and OpenID Connect** - LinkedIn Learning | 2024

WORK EXPERIENCE

CONTENTSTACK INDIA PVT. LTD. | Pune, India - Remote

Senior Software Engineer I | Aug 2024 – Present

Software Engineer II | Nov 2022 – Jul 2024 | Promoted

Platform & Authorization Engineering:

- Transformed the platform from two fixed roles into an **unlimited, multi-product RBAC framework** with granular permission controls, strengthening customer governance and reducing support escalations while becoming a recurring differentiator in enterprise sales.
- Architected and delivered** the multi-org invitation and onboarding workflow for a multi-tenant model where users belong to several organizations, assigning permissions at invitation time and supporting **two product teams** through end-to-end RBAC adoption using **OPA/Rego policy enforcement**.
- Extended RBAC** into SSO onboarding, SCIM onboarding, and the role-update flow, shipping **2–3 default roles per product** alongside custom role creation.
- Built** a unified authentication layer spanning **multi-tenant OAuth 2.0, SAML-based enterprise SSO, and SCIM provisioning**, enabling seamless integration with enterprise identity governance ecosystems and supporting faster procurement approvals.
- Partnered with **Okta and Microsoft Entra ID engineering** teams to ship native SAML SSO and SCIM applications, now live in both marketplaces.
- Built an internal gRPC-backed auth package adopted by 9 product teams**, allowing them to consume authentication and RBAC without reimplementing either.

Session Governance & Security:

- Delivered** a self-service session management suite covering configurable idle/absolute timeouts, user-level whitelisting, and active session termination, providing enterprise customers with direct compliance controls without support intervention.
- Achieved zero findings** in a third-party security audit for the session management rollout, eliminating a recurring procurement concern for enterprise customers.
- Drove remediation of a separate third-party security audit, cutting open findings from ~150 to 10 within two quarters**, and extended 2FA from SMS-based to authenticator-app-based across the platform.

Platform Scale, Observability & Reliability:

- Optimized** authentication infrastructure serving approximately **2–3B requests daily**, redesigning the Rego/OPA policy evaluation and Redis caching data models to cut latency on the slowest requests from **~13s to under 200ms**.
- Re-engineered** service logging around high-signal events, improving observability and RCA precision while reducing **Datadog/Observe consumption costs**.
- Owned end-to-end authentication incident response**, increasing incident resolution throughput by **3x** and reducing average resolution time by **~30%**, consistently maintaining SLA commitments for enterprise accounts.

AI-Augmented Engineering:

- Integrated Claude Code, GPT, and GitHub Copilot across the SDLC** — test generation, code review, debugging, incident RCA, and security analysis — contributing to **2–3x more PRs per sprint** and **85%+ test coverage, up from 75%**.
- Authored the AGENT.md/SKILLS.md and cross-repo agent-navigation docs** mapping features and flows to exact files, as well as a feature-wise prompt/playbook library (RCA, test generation, conflict resolution) that cut bug turnaround from **2–3 days to a single day** with the fix ready.

Recognitions:

- Thank You Award | Q1 2026** - Recognized for delivering the session management rollout with **zero security audit findings**.
- Thank You Award | Q4 2024** - Recognized for sustained ownership and leadership of the **RBAC platform initiative**.
- Thank You Award | Q3 2023** - Recognized for proactively resolving **customer-facing authentication failures** and strengthening authorization policies through comprehensive RCA.

BESTPEERS INFOSYSTEM PVT. LTD. | Indore, India — Hybrid

Senior Software Engineer | Sep 2021 – Nov 2022

Software Engineer | Sep 2020 – Sep 2021 | Promoted

- Led 5+ developers** technically across concurrent client engagements, running Agile ceremonies (Scrum/Kanban), including sprint planning, backlog grooming, and retrospectives.
- Accelerated feature delivery** by decomposing a monolithic application into **3 independently deployable microservices**, reducing cross-team dependencies and enabling parallel development across healthcare, EdTech, and staffing platforms.
- Sustained 80%+ on-time delivery** across concurrent client engagements, protecting delivery commitments, client relationships, and renewal opportunities in high-pressure environments.
- Strengthened software quality** by driving test coverage beyond **85%**, reducing regression incidents and lowering post-release defect remediation effort.
- Delivered full-stack product enhancements** across APIs, backend services, user management, integrations, and web applications for multiple client-facing SaaS products.

GYRIX TECHNOLABS LLP | Indore, India - On-site | Software Engineer | Feb 2019 – Sep 2020 (Included 2-month internship)

- Accelerated deployment cycles by implementing **CI/CD pipelines**, reducing deployment time from **2–3 hours to under 30 minutes** while eliminating manual deployment errors.
- Modernized legacy front-end architecture by migrating **AngularJS applications to React.js micro-frontends**, reducing load time from **3–4 seconds to under 1.5 seconds** and decreasing front-end development effort.
- Maintained **80%+ test coverage** across applications, strengthening release quality and reducing production defects.
- Established predictable client delivery through **biweekly product demonstrations** across two platforms during a **19-month engagement**, enabling iterative feedback cycles and consistent release execution across web and mobile applications.

PERSONAL DETAILS

- Date of Birth:** 7th April 1997 | **Languages Known:** English & Hindi
